

BCCDC Take Home Naloxone Distribution Data Collection

Update to distribution data collection process effective July 2023

A new data collection process has been developed and will be effective as of July 2023.

Monthly THN kit distribution records will no longer be required to be submitted as of June 26, 2023. However, please do submit any records that have been completed to date.

NEW PROCESS

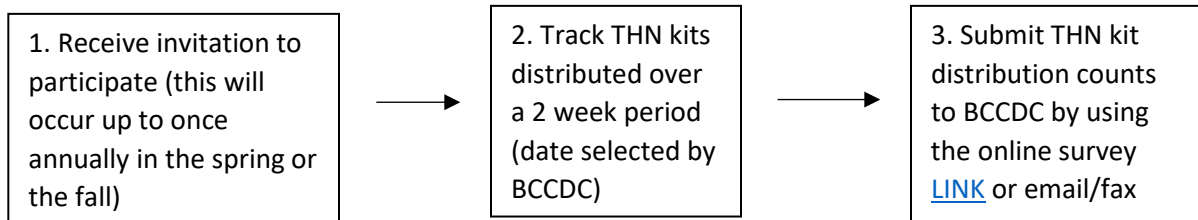

Instead of asking sites to report information on each individual kit given out, we are instead asking you to share information on the total number of kits given out **over a two week period (selected by BCCDC)** either online or using the [Paper-Based Data Collection Tool](#). You will need your **site ID** number provided by BCCDC to submit your kit distribution data.

- The [THN Distribution Data Tracking Tool](#) can be used to keep count of the kits given out during the 2 week period of data collection
- At the end of the 2 week period, please submit your kit distribution counts to BCCDC using the [Checkbox Survey](#). This submission process should only take about 5 minutes.

[Checkbox Survey](#)

- Alternatively, the [THN Distribution Data Collection Form](#) can be used to submit kit distribution data to BCCDC by emailing naloxone@bccdc.ca or fax **604-707-2516** if the online format is not feasible for your site.

Please Note: There is **no change** to the THN [Kit Transfer Record](#) or [Overdose Response Information Form](#). This is **ONLY** a change for the THN Distribution Record reporting process.

All completed forms and questions can be directed to naloxone@bccdc.ca or fax to 604-707-2516
