Take-Home Naloxone Kits, Phone Ownership and Knowledge of the Good Samaritan Drug Overdose Act Among People Released from Correctional Facilities in BC, Canada

What was our study about?

Our study aimed to answer - do people being released from correctional centers:

- Have training on how to recognise and respond to an overdose and use naloxone?
- Own a naloxone kit on release?
- Own a cell phone on release?
- 4 Know about the Good Samaritan Drug Overdose Act (GSDOA)?

In 2019, questions about THN training and kit possession, phone ownership and *GSDOA* awareness were added to the survey administered to UTG clients.

Who did we hear from?

Participants were recruited from the Unlocking the Gates (UTG) Service Society. UTG is a peer mentoring program that supports people transitioning out of provincial correctional facilities.³

When? Between Jan 2019-Sept 2020

Who? 137 participants completed the survey and were included in the analysis 65 men & 72 women

¹ The Take Home Naloxone program aims to ensure access to naloxone, a medication that can reverse opioid overdoses, for all those at risk of experiencing or witnessing an overdose in BC. For more information, visit: https://towardtheheart.com/naloxone

² The Good Samaritan Drug Overdose Act aims to encourage bystanders to contact emergency medical services by providing legal

protection for simple possession charges at the scene of an overdose. For more information, visit:

Had a THN kit on release

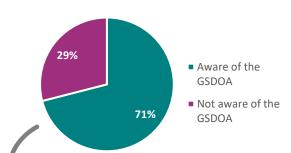

44% • Had a kit • Did not have a kit

People who self-identified as at-risk of overdose who had a

kit on release

GSDOA knowledge

Nearly all (99%) participants who were aware of the *GSDOA*, reported that they would call emergency medical services (911) if they witnessed an overdose.

Had a cell phone on release

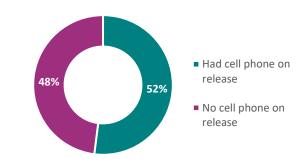

Figure 1. GSDOA wallet cards

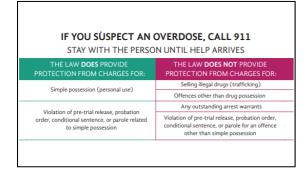

This enactment amends the Controlled Drugs and Substances Act to exempt persons seeking emergency medical or law enforcement assistance for themselves or for others at an overdose from being charged for simple possession or for violation of pre-trial release, probation order, conditional sentence, or parole related to simple possession, if the evidence in support of that offence was obtained or discovered as a result of seeking assistance or remaining at the scene. This applies to any person at the scene upon the arrival of assistance, including the person who overdosed.

Please refer to Bill C-224 for details.

Key interventions

- ✓ UTG peer mentors now have THN kits to distribute to clients released without a kit.
- ✓ UTG peer mentors now have *GSDOA* wallet cards (Figure 1) and distribute cards and discuss the *GSDOA* with clients.
- ✓ At the request of Correctional Health Services, a brief informational presentation about the *GSDOA* was developed for corrections staff, see: https://towardtheheart.com/resource/training-resource-improving-awareness-and-knowledge-around-the-gsdoa/open More work is needed to encourage access to communication technologies among people being

released from correctional facilities.
