

If you suspect a drug poisoning (overdose) - Should you give naloxone?

Give naloxone only if someone is **NOT** breathing normally.

Call 9-1-1

Check - Are they breathing normally?

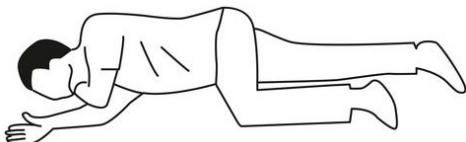

- Taking 12 or more breaths per minute
- No unusual sounds (gurgling, choking)

YES

Do NOT give naloxone

Support and monitor

If breathing is normal,
put them in the recovery
position and wait for help

NO

Give 1 breath every 5 seconds

**Have they received a
dose of naloxone?**

YES

Keep giving 1 breath every 5
seconds

Check breathing again

Give another dose of naloxone
every 3 minutes until breathing
normally

NO

Give 1 dose of
naloxone
